AMRITA KUMARI

Full Stack Developer

+91-8823818640 | amritakumari24@navgurukul.org | Korba, Chhattisgarh, India | GitHub | LinkedIn

SUMMARY

Software & AI Engineer and 3rd-year BCA student with hands-on experience in React Native, React.js, Python, Flask, REST APIs, and modern software development. Skilled in AI/ML, Generative AI, and AI-assisted development using Claude and Codex. Experienced in debugging, testing, API integration, GitHub collaboration, and building reliable mobile and software solutions for real-world applications.

SKILLS

AI/ML & Tools	:	AI/ML Fundamentals, Generative AI, Claude, Codex
Backend & Web	:	Python, Flask, Node.js, Express.js, REST APIs, JavaScript (ES6+), HTML5/CSS3, React.js
Databases & Tools	:	MongoDB, Git, GitHub, Postman, VS Code, ngrok, Antigravity
Cloud	:	AWS EC2, AWS S3, Amazon CloudFront, Render
Mobile Development	:	React Native, Nativewind, Android Studio, Expo
Soft skills	:	Problem Solving, Communication, Debugging, Teamwork, Adaptability

EXPERIENCE

Frontend Developer Intern, SetuMesh **Jan 2026 — May 2026**

- Workflow & System Verification: Analyzed end-to-end system requirements, validated cross-platform responsive interface code, and ensured code quality compliance across development cycles.
- Logic Testing & Documentation: Executed frontend scripts in local dev environments using Git and ngrok, inspecting component lifecycles, debugging workflows, and thoroughly documenting technical processes for team reuse.
- Cross-Functional Collaboration: Collaborated closely with engineering teammates to resolve system inconsistencies and maintain clean, scalable code structures.

React Developer Trainee, NavGurukul Bootcamp **Sep 2025 — Jan 2026**

- Software Development & Logic: Built modular React.js components utilizing efficient algorithms and state management techniques for dynamic rendering.
- Requirements Analysis: Reviewed and optimized system logic across sprint cycles to adhere to strict coding standards and maintain consistent UI performance.

PROJECTS

AI-Assisted Leave Management System, Link

- Developed RESTful backend APIs using Python/Flask and Express.js, implementing custom DSA logic for evaluation accuracy and automated processing.
- Validated database operations and secure JWT authentication while maintaining structured documentation for deployment.

Healthcare Appointment & Records Portal, Link

- Built responsive patient routing and lazy-loading components designed for efficient client-side data handling and caching.
- Managed cross-component application state to eliminate data mismatches during core booking workflows.

AI-Chatbot, Link **Present**

- Developed a full-stack AI chatbot using React, FastAPI, and the Groq API, supporting text and microphone-based user input.
- Integrated AI-generated responses with Markdown rendering and text-to-speech playback for an interactive conversational experience.
- Built and integrated REST API endpoints for communication between the React frontend and Python backend.

CERTIFICATIONS

Introducing Generative AI with AWS, Udacity **Aug 2025**
Version Control, Meta **Jan 2025**
Introduction to Docker, Google Cloud **Jul 2026**
Introduction to Git and GitHub, Google **Feb 2025**

EDUCATION

Eternal University, Baru Sahib, Baru Sahib, India - *Bachelor of Computer Applications (BCA) 3rd Year, Computer Applications - (GPA: 9.08)* **2024 — Present**
SAGES Banki Mongra, Korba, CG, Korba, India - *Higher Secondary (12th Standard) - (GPA: 90%)* **2021 — 2022**
GHHS Mongra, Korba, CG, Korba, India - *Secondary School (10th Standard) - (GPA: 95%)* **2019 — 2020**

AWARDS

Certificate for Excellence , Eternal University **Nov 2025**
Recognized for outstanding performance in the NavGurukul Program during November 2025 at Eternal University.

VOLUNTEERING

Volunteer Teacher , Akal Academy, Baru Sahib **Nov 2024 — Nov 2024**
Conducted an engaging one-day teaching session for 2nd-grade students.
